Your star today

(Mar 21st - Apr 20th)

You may have turned a page in the book of love. For the past month or so, you have likely been devoting the major part of your energy to finding emotional and romantic fulfillment. Today, you feel compelled to meditate on all the agitation of the past month in an effort to understand exactly what it means. Certain deeds were done, certain words were said.

(Apr 21st - May 21st)

The day ahead should be fairly calm, and you'll be able to take advantage of the opportunity to pay some attention to your emotional life. You and your partner may have hit some rough weather in the past month, and the seas have not completely calmed. Perhaps you should set the stage for a romantic dinner.

(May 22nd - Jun 21st)

Today, it's almost as though you're graduating from college with a degree in love. And it's an honours degree, at that. Today, your morale is so strong that you are able to look at relationships from all sorts of angles. You can see what's right and what's wrong not only in your own love life, but in your friends' relationships as well. What do you say, is it time to go on to graduate school?

(June 22nd - July 23rd)

Peace and harmony seem to be thriving today. Believe it and enjoy it. Now is the time to return from the desert island where you've been hiding for the past few days. In any case, if life on land is unpleasant, you can always return to your solitude. However, don't be away too long, as the forecast for romance is bright...

(July 24th - Aug 23rd)

Have you resolved to stop dating? Not you! Don't be surprised if you're extraordinarily popular today, in spite of the fact that your self-confidence has undergone a change. It is still very much present, but is now fed from an internal source rather than an external one. It is nice to be popular, to be sure, but it is no longer as important to you as it once was.

(Aug 24th - Sep 23rd)

The day ahead should be fairly pleasant, giving you a chance to think about your love life. Today, you feel as though you're looking through a photo album. As certain images come to mind you are flooded with emotion. If you explore these intense feelings you should be able to draw some valuable conclusions about the past month.

(Sep 24th - Oct 23rd)

It's true, passion is seductive. But passion is not always a positive emotion, especially when it puts you at risk of veering off your path. Today's aspects suggest that you consider whether the people you tend to fall in love with are ultimately beneficial to your life. Do you often find yourself in the embarrassing situation of being with a person you no longer care about, yet you're too bashful to tell them?

(Oct 24th - Nov 22nd)

You're going to be offered a good exercise in simplicity today. It may be that someone offers you a promotion or all kinds of honours. The test will be to see if you become filled with self-importance, even to the point where you change the way you dress. Or, on the contrary, will you remain unflustered, thinking that all the fuss over you is wonderful but isn't really of great importance?

(Nov 23rd - Dec 21st)

Luck is surely smiling down on you at the moment. Doors are opening up that you hadn't even known were there. But your response is strange. Why is it that you don't seem to have much enthusiasm for what is being offered at the moment? A few months ago you would have jumped for joy and now something is making you feel pensive and circumspect.

(Dec 22nd - Jan 20th)

If you are required to wrap up an agreement with partners or work in a group situation today, it would be better to hold off a bit if you can. Your way of collaborating with people is in the process of changing, and this is making it difficult right now for you to focus all of your energy on the forces you are organizing. You should choose your partners and collaborators with care, and by all means don't rush...

(Jan 21st - Feb 19th)

If you have made some strong resolutions lately, most notably concerning your professional life, wait a little bit before putting them into action. Your resolutions may have been made when you were in a panic and not when you were feeling particularly wise. Take the time to look over your objectives. Contrary to what people may have been advising.

(Feb 20th - Mar 20th)

What relationships do you need to be concerned with? The current configuration suggests there are issues that need addressing. If this is the case, try to assert yourself more than is normal for you. Your natural humility sometimes pushes you to retreat and afterward you feel bad about it.
