BIS holds investiture ceremony

The Investiture Ceremony of Bahrain Indian School (BIS) for the academic session 2018-2019 was held to assign responsibilities to the newly elected office bearers. The function was presided over by BIS Principal Saji Jacob in the presence of BIS Director Ritu Verma.

'The Investiture Ceremony sets the right tone for an academic year during which the young leaders not only learn to guide other students but also create models in leadership for others to emulate, reinstating the faith in the calibre and leadership of the future generation', said Principal Saji Jacob.

The newly elected students were conferred badges and sashes by the Director, Principal and Coordinator of the school. The Head Boy - Steve Chalil Biju and Head Girl - Amruta Phadke delivered speech, thanking the audience and conferred that they will fulfil the responsibilities as assigned to them.

Physical Education Teacher Hemanth administered the oath of office. Students pledged to serve the school and fulfil their duties to the best of their abilities. The Student Council also promised to take the school to new heights and resplendence.

The school management congratulated the children on getting elected for the leading roles and guided them to be impartial and honest in discharging their duties.

Oath by new office bearers

RCSIB, GAPIO host joint-research meeting

Participants during a photocall

Under the Patronage of Supreme Council of Health Chairman, Lieutenant General Dr Shaikh Mohammed bin Abdulla Al Khalifa, the Royal College of Surgeons in Ireland - Medical University

of Bahrain (RCSI Bahrain) on Friday played host to a first joint-research meeting with the Global Association of Physicians of Indian Origin (GAPIO).

The event featured a series of keynote lectures, discussions and

poster presentations involving students and senior academic staff, as well as representatives of other institutions from around Bahrain and further afield, including American Mission Hospital, Arabian Gulf

University (AGU), the Indian Medical Association and Weston General Hospital in the UK.

Among the subjects under focus during the event were medical image processing for 3D printing; diabetes

and neuroprotection; sickle cell disease; humour aids in education; academic professional development; postdoctoral research and the significance of sigma receptors in breast cancer.

The main objective of

this event was to provide an opportunity for academics and healthcare professionals from RCSI Bahrain and the Indian medical fraternity in Bahrain to network and discuss ongoing research projects.
