YESTERDAY'S SOLUTION

How to play:

Place a number in the empty boxes in such a way that each row across, each column down and each 9-box square contains all of the numbers from one to nine.

Your star today

(Mar 21st - Apr 20th)

Planetary energies have your brain operating at an even higher level than usual. Your thoughts jump from one topic to the next, as first you wonder about the future of the space program and then the benefits of diesel fuel. There's no reason to your thoughts, but they are plentiful. Pay attention as there are likely to be some real gems amidst the clutter.

(Apr 21st - May 21st)

You might want to pack your bags, for all indications are that you're going on a trip. Perhaps you might be doing some travelling for work, but more likely you are going somewhere in pursuit of a personal dream. Distant lands beckon, and if you cannot get there right away you should begin making plans for how you can get there in the future.

(May 22nd - Jun 21st)

This day could be downright boring. Your mind is filled with exciting new ideas and your body is chomping at the bit for physical activity. Even if you're desk bound today, you can at least escape mentally. Do an Internet search for hot vacation getaway spots during your lunch hour.

(June 22nd - July 23rd)

Dreams continue to be a big part of your life today. It is likely that you have been having some unusual ones lately, and you wonder about their significance. Why not go to the library and check out a book or two? You may be fascinated by what you discover. Remember: dream interpretation is an art, not a science. If you're really curious, seek out an expert.

(July 24th - Aug 23rd)

Be sure to eat a good breakfast this morning as you are going to need your energy for the day! You will come in contact with some fascinating people today. Perhaps some colleagues have arrived from the foreign office. The conversation at lunch is likely to be heated and wide-ranging, as this particularly bright group of individuals touch upon all topics of interest.

(Aug 24th - Sep 23rd)

Keep your eyes and ears open for any new opportunities. Today you will have a chance to become involved in a group that is important to you. Perhaps you are invited to be a team member on a group project at work. Or it may be that you are accepted into a group of some kind. Any new endeavour you begin today is likely to turn out splendidly.

(Sep 24th - Oct 23rd)

Today your mind is filled with creative ideas, and you're anxious to try out some of them. All in good time. For now, you would be best served doing what is expected of you. Save the innovation for after hours. Once everything is in place and all the kinks have been worked out, then you can introduce your ideas to your bosses with the confidence that your working model is, indeed, working.

(Oct 24th - Nov 22nd)

Change is very much in the air today as well as the disruption that often comes along with it. You can expect all sorts of things to go wrong today. While none of the malfunctions are major, they do combine over the course of the day to fray your nerves and try your patience. Try to stay calm and keep your perspective. All will get resolved in time.

(Nov 23rd - Dec 21st)

If one of your goals has been to become more active and involved in community issues, then today is your chance. It is likely that you will be invited to join a volunteer group. Your particular skill set is sorely needed. While you may be reluctant at first you will find that once you begin to participate that you very much get caught up in the cause.

(Dec 22nd - Jan 20th)

You have done well in your career, and it is likely that you will continue to do so. In fact, your financial situation has never looked rosier. This is no time to stop and rest on your laurels. You have some good momentum going, you should make the most of it. Put your nose to the grindstone at work and you will continue to reap the rewards.

(Jan 21st - Feb 19th)

This is bound to be another exciting day where you would be lost if you didn't have a series of exciting events occurring in one day. It may be that you meet some new colleagues and you hit it off famously. Perhaps you receive word that you're going on an exciting business trip! Whatever the day's excitement brings, handle it with your usual grace and aplomb.

(Feb 20th - Mar 20th)

Make the most of your creativity to do some painting or some writing. You have much talent, and need only use it on a regular basis in order to enhance it. Today you may discover not only how talented you are, but also how much you enjoy the process of creating. Give yourself the gift of time, and the focus necessary in order to use your abilities to their full potential.
