## Your star today

(Mar 21st - Apr 20th)

Some rather intense and vivid dreams could inspire you to embark on some in-depth study of a subject that specifically interests you. This could involve the arts, philosophy, or metaphysics. Travel plans to one of the world's great spiritual centres might be on your mind as a result.

(Apr 21st - May 21st)

Romantic relationships take on a fairytale aura, bringing up the kind of desire, passion, and sense of unity associated with Lancelot and Guinevere. Therefore, this should be a wonderful day to schedule an intimate evening with a romantic partner. You could feel so much in tune with your friend that you may come with the same words at the same time.

(May 22nd - Jun 21st)

Today you might attend more than one group activity or social event involving spiritual or metaphysical matters. Your sense of intuition is very high, and your level of understanding is especially acute. Therefore, concepts that could be confusing at other times could seem as clear as a bell today. You might form strong bonds with others who are also present. Enjoy!

(June 22nd - July 23rd)

Intellectual or artistic work could take up a lot of your time today. Your level of inspiration is high, and you're apt to be full of ideas that others would find beneficial. You're also likely to sense the thoughts and feelings of those around you before they themselves are consciously aware of them.

(July 24th - Aug 23rd)

Study of religion and spiritual matters could well be of particular interest for you today. You're likely to discuss your knowledge regarding such matters with a close friend, which could prove rather enlightening for both of you. Whatever you learn will prove to be inspiring, so don't be surprised if you find yourself spending some time writing down your thoughts.

(Aug 24th - Sep 23rd)

Today communication with others is more likely to be on a subtle rather than verbal level. When the phone rings, you might already know who's on the other end of the line before you pick it up. You could also pick up telepathically on the thoughts of others. Books and articles about people who have had similar experiences could increase your understanding of them. Don't fight it! Go with the flow.

(Sep 24th - Oct 23rd)

Inspiration drawn from recent religious or spiritual occurrences could have you writing down accounts of your experiences, perhaps with the idea of someday publishing them. Your concentration could well be intense, as writing for you today may not be only creative but therapeutic as well. It will also help to attend classes or workshops.

(Oct 24th - Nov 22nd)

You should be feeling especially strong and healthy today. The drive to exercise, particularly if you do it alone and outdoors, is likely to get the endorphins going and thus give you a natural high, which could lead to an increased level of inspiration and intuition. After you finish, it might be a good idea to sit in a park, preferably near water, to allow yourself to come down.

(Nov 23rd - Dec 21st)

Today, you might find yourself picking up uncanny telepathic messages from a friend who lives some distance from you. A telephone call might reveal that this person has just received some good news, and that they were just thinking of calling you! This probably won't be the only ESP experience you have today. Your level of intuition is very high, so be prepared for some strong psychic messages.

(Dec 22nd - Jan 20th)

Creative inspiration flows freely today, enabling you to channel it in more than one way. An opportunity to earn a sizable fee doing something artistic could come your way. Spiritual or metaphysical studies may be involved. This might represent the attainment of a long-term goal you've been striving to reach, and therefore you're apt to be rather excited about it.

(Jan 21st - Feb 19th)

Usually you prefer to approach events with a practical and scientific attitude, but today you're feeling especially intuitive and more aware of the other worlds, so it might be difficult to hang on to your usual mindset. Some uncomfortable feelings you've had about events in the news could prove to be accurate, which might be a bit disconcerting.

(Feb 20th - Mar 20th)

If you've been thinking about taking up the study of astrology, numerology, alchemy, or any other occult science, this is the day to get started. Scientific adherence to facts and rules combines with enhanced telepathic abilities to bring about a burgeoning skill in such fields. Look up some friends who share your interest and arrange to attend a class or workshop.
