

Court orders restoration of electricity to villa renter

TDT | Manama

The Court of Urgent Matters issued a ruling that restored electricity to a client who had rented a villa, following its abrupt disconnection by the owner.

The court's urgent ruling compelled the Electricity and Water Authority (EWA) to take immediate action against the villa owner, ensuring the restoration of electricity and water services.

Furthermore, the owner was mandated to bear the associated fees and expenses. The tenant

of the villa was taken by surprise when the owner, based on a request made to the EWA, cut off the electricity supply to the property, rendering it unusable.

In addition to the electricity disruption, the owner also deactivated the designated water pipes, exacerbating the inconvenience faced by the tenant. Remarkably, within a remarkably short timeframe of less than two hours from the initiation of the lawsuit, a hearing was convened.

The court expeditiously

appear at the hearing to present any plea, defence, or evidence substantiating the lawful termination of the lease contract or any mutual agreement.

Consequently, the court reached the conclusion that the owner's actions, by depriving the tenant of electricity and water services despite the ongoing contractual relationship, unjustly hindered the tenant's rightful enjoyment of the property. Therefore, the court rendered a favourable ruling to remove this obstruction and reinstate the crucial services, thereby safeguarding the tenant's rights.

termination, which was swiftly confirmed.

However, the owner failed to

Symposium to improve passenger identification

Col. Daij Issa Al Kuwari
TDT | Manama

Colonel Daij Issa Al Kuwari, Director of the Bahrain International Airport Police Directorate at the General Administration of Ports Security, has attended a symposium on the Traveller Identification Programme (TRIP) in Montreal, Canada.

The symposium, organised by the International Civil Aviation Organization (ICAO), focused on procedures for improving passenger identification. During the event, participants discussed new technological opportunities and policies to enhance the successful application and better use of traveler identification tools.

The symposium also covered topics such as biometric measurements and the use of new passenger data reader devices in identifying travellers.

'National Educator and Teacher' programme reviewed

TDT | Manama

The Supervisory Committee of the "National Educator and Teacher" programme, chaired by Her Highness Shaikha Hessa bint Khalifa Al Khalifa, Member of the Supreme Council for Women (SCW), reviewed the second phase of

The programme aims to support female workers' participation in the early education sector and improve their performances.

the programme's action plan, focusing on family stability and equal opportunities within the National Plan for the Advancement of Bahraini Women.

The committee aims to support female workers' participation in the early education sector and propose solutions to improve its performance.

The committee reviewed proposals to enhance private sector partnerships for early education and the "Training and Wages Support" programme, aiming to establish professional paths and link them to social insurance, preparing for the end of temporary contract formulas.

They stressed the importance

of educating the administrative and educational staff working in the sector about their job rights and occupational health and safety, as well as diversifying sources and methods of development and learning through preparing guidelines and implementing specialised workshops.

Works Ministry completes deceleration lane construction project in Isa Town

The expanded eastern entrance to the educational zone

TDT | Manama

The Ministry of Works has announced the successful completion of a project aimed at alleviating traffic congestion in Isa Town.

The project involved the construction of a deceleration lane, expanding the eastern entrance to the educational zone on Bahrain National Charter Street to Route 4013.

By expanding the street from one lane to two lanes, the min-

istry aims to increase capacity, reduce traffic congestion, and improve the flow of vehicles to the educational area. The capacity of the previous single lane was 850 vehicles per hour, but with the additional lane, the capacity will increase to 1,700 vehicles per hour, a significant 50% increase.

As part of the project, an extra lane was built to facilitate right turns from Al Mithaq Street to Road No. 4013. The project also involved the protection and relocation of several services

belonging to the Electricity and Water Authority.

The contract for the project was awarded to Bahrain Asphalt Company by the Tenders and Auctions Board, with a total cost of 80,000 dinars.

This infrastructure improvement is part of the fourth phase of efforts by the Ministry of Works to ease traffic congestion at key intersections on the road network, ultimately enhancing the overall transportation experience for residents and visitors alike.
