

# Safety measures

Interior Ministry directorates carry out field operations to safeguard lives and property amid heavy rainfall  
The Ministry of Interior's relevant directorates have begun intensive efforts to address the impact of heavy rains and ensure the safety of citizens and residents. These efforts include field operations and handling rainwater-related cases to protect lives and property.

## Rain disruption

Rainy weather prevailed across several parts of Bahrain yesterday, with scattered rainfall causing water accumulation in some areas, disrupting transportation and slowing traffic. The Kingdom witnessed the showers alongside colder conditions. The Meteorology Department forecast cloudy skies today, with rain likely to intensify and become thundery at noon, continuing until evening.

# Governor attends successful ‘Southern Celebrations’ Festival

HH Shaikh Khalifa bin Ali Al Khalifa visits a stall

TD | Manama

His Highness Shaikh Khalifa bin Ali Al Khalifa, Southern Governor, attended the “Southern Celebrations” festival at Khalifa Grand Park in Riffa.

The festival is part of the ongoing series of events and festivities marking the Kingdom’s National Days celebrations, the 26th anniversary of His Majesty King Hamad bin Isa Al Khalifa’s Accession to the Throne, and the accompanying national occasions.

HH Shaikh Khalifa bin Ali said the festival reflects ongoing efforts to revive the governorate’s heritage and safeguard the customs and traditions passed down through generations.

The Governor noted that the festival is part of a series of activities and programmes aimed at strengthening community partnerships and promoting the values of belonging and citizenship, while introducing visitors to the governorate’s heritage, traditional crafts, professions, and industries.

# Promoting health, judicial awareness

TD | Manama

As part of its efforts to strengthen community engagement and promote judicial awareness, the Public Prosecution’s Forensic Evidence Directorate participated in the 4th Manama Health Congress and Expo, with active involvement and specialised presentations highlighting their technical and scientific roles.

The participation reflects the integration of expertise across different specialisations to serve the justice system.

The event aimed to showcase the latest scientific and

technical practices in evidence analysis and support for investigative bodies.

It also provided a platform to highlight national capabilities and specialised expertise, emphasising the FED’s pivotal role in achieving justice.

The participation aims to raise awareness of the work of forensic evidence departments and laboratories and their role in protecting rights and upholding the rule of law.

Simplified explanations were provided to exhibition visitors on evidence collection and analysis procedures and their importance in uncovering the truth.

# Major sewage network project in Arad completed

Well-paved road

TD | Manama

Ministry of Works has announced completion of a sewage network project in Block 246 and part of Block 241 in the Arad area of Muharraq Governorate.

Project forms part of ongoing plans to develop infrastructure and enhance service efficiency in line with residents’ needs.

Sewage services are now provided to 320 properties, including 240 developed plots

and 80 undeveloped plots.

Works included construction of 4,865 metres of main sewage lines and 2,334 metres of branch lines, along with installation of 478 main and branch inspection chambers.

Road paving works linked to project phases were also completed.

Ministry reaffirmed commitment to developing infrastructure in line with urban growth across the governorates, aiming to expand public sewage network connections.
