

# ‘More Fashions by MEETU’ brings timeless Indian elegance to Segaya Walk

Ashen Tharaka  
TDT | Manama

Bahrain's fashion landscape witnessed a vibrant addition with the grand opening of More Fashions by MEETU at Segaya Walk on October 18. Launched just ahead of Diwali, the boutique marks a new destination for those seeking authentic Indian craftsmanship blended with contemporary elegance.

The ribbon-cutting ceremony was gracefully conducted by Ms. Zahra Alshaikh, Dr. Mridul Gehlot, and Ms. Swati Gehlot. The event also witnessed the esteemed presence of Mr. Tejasvi Singh Gehlot, Director, International Kabaddi Federation, and President, Rajasthan Olympic Association, who congratulated the team for bringing Indian culture and fashion closer to Bahrain's cosmopolitan audience.

Founder and CEO Mamata Tiwari (Meetu) expressed her delight at the warm response from the community, saying:

“Each creation at More Fashions tells a story — a celebration of colours, textures, and intricate artistry. We aim to bring India's timeless elegance to Bahrain through designs that resonate with today's confident, modern woman.”

Sharing the inspiration behind the concept, she added:

“Bahrain is home to a diverse community that deeply appreciates Indian culture and fashion. I wanted to create a space that bridges tradition and trend — where every outfit feels personal, handcrafted, and memorable.”

Her husband, Ram Tiwari, who serves as Country Head – Enterprise in Bahrain's telecom sector, expressed his appreciation for the initiative, saying:

“Meetu will surely work towards bringing something truly special to Bahrain's fashion market — a fusion of authentic Indian design and bespoke tailoring that reflects refined taste

and craftsmanship.”

The boutique showcases a wide collection of Banarasi silk sarees, elegant lehengas, and ethnic ensembles, each designed to blend heritage with modern

silhouettes. In addition to ready-to-wear pieces, the store offers custom tailoring and personalized styling, ensuring every customer experiences exclusivity and comfort.

With a curated selection inspired by both traditional artisans and Bollywood couture, More Fashions by MEETU promises to become a landmark for fashion enthusiasts across the

Kingdom.

For inquiries or appointments, visit [www.morefashions.style](http://www.morefashions.style), call 39989683, or visit the boutique at Segaya Walk, Manama.

## Huawei Empowers Global Innovation with an Open, Reliable Computing Alternative

Dubai, UAE

Huawei successfully held its first General-purpose Computing Forum at GITEX 2025. Global analysts, open-source representatives, experts, and industry leaders gathered at the event to discuss computing trends, drivers of ecosystem success, and best practices across key sectors. Discussions converged on one clear future: openness is the essential path to an intelligent world.

“As a pioneer on this open path, Huawei is deeply committed. We adhere to the principle of open hardware, open-source software, partner empowerment, and joint ecosystem development,” said Michael Chang, President of Huawei Computing Marketing & Solution Sales Dept.

Michael also highlighted how open ecosystems like Arm, spanning hardware, software, and OS, deliver broader choices, lower barriers, and greater innovation. To date, Huawei's computing ecosystem has over 6 million developers, more than

8,000 partners, and over 22,000 certified solutions. The Kunpeng hardware powers core applications in finance, energy, the public sector, carriers, and manufacturing. “We aim to co-build a sustainable global computing ecosystem with industry partners, providing an open and reliable computing alternative for the Middle East and the world,” Michael added.

Building on this vision, Hu Zhengce, Vice President, Huawei Middle East & Central Asia ICT Marketing & Solution Sales Dept., detailed the progress: “On the hardware front, Kunpeng continues to evolve with more cores and higher performance. In terms of software, Kunpeng has maintained a consistent commitment to open source over the past six years. We have

progressively open-sourced the openUBMC firmware management software, openEuler OS, openGauss database, openFuyao computing cluster SDK, as well as BiSheng JDK and compilers. This year, Kunpeng continues to open-source its solutions, including Boost-Kit for application enablement and the KUPH high-performance computing framework. These efforts empower customers and developers with seamless integration and deployment, delivering simpler processes, smoother upgrades, and easier maintenance.”

The forum attracted enthusiastic participants from the Middle East, Central Asia, Africa, and beyond, including representatives from industry sectors such as carriers, finance, public

service, energy, and manufacturing, as well as academia. Speakers noted the computing industry is undergoing its most significant infrastructure transformation in 20 years, driven by three key trends: open source becoming mainstream, heterogeneous computing emerging as the new benchmark, and the global Arm ecosystem becoming mature.

Kunpeng, as a core Arm ecosystem builder, reached 25% market share in China by the end of 2024. Now, Kunpeng is ready to accelerate digital intelligence with partners across the Middle East and Central Asia, ushering in a new computing era.

## GPC and Kanoo CleanMax partner to power Bahrain's Sustainable future

Manama

General Poultry Company (GPC or “General Poultry”), a wholly-owned subsidiary of Bahrain's sovereign wealth fund Mumtalakat, has signed a 15-year Solar Power Purchase Agreement (PPA) with Kanoo CleanMax Renewables Asset Co. W.L.L. (“Kanoo CleanMax” or “Kanoo CleanMax Renewables”) to install a 1.5 MWp rooftop Solar PV Powerplant Project across its Hamala farms and production facilities. The project will generate approximately 2,400 MWh of clean energy annually, supplying up to 90 percent of GPC's daytime power requirements and offsetting more than 1,100 metric tons of CO emissions every year.

The signing ceremony, held at GPC's premises, brought together senior representa-

tives from both organizations, marking a significant collaboration between two industry leaders committed to environmental responsibility and operational excellence.

Speaking during the signing ceremony, Mr. Sami Zainal, Chairman, GPC said, “This initiative aligns perfectly with GPC's long-term vision of embedding sustainability into our core business operations.”

Mr. Ali Abdulla Kanoo, Chairman, Kanoo Industrial & Energy, commented: “We are proud to partner with General Poultry Company on this forward-looking solar initiative.”

Mr. Wael Itani, CEO, GPC, added, “This partnership initiative with KANOO CleanMax is rooted in our ESG framework and marks a major milestone in GPC's decarbonization journey and a shift towards energy diversification.”
