

Dynamic Indian education

Education in India is provided by public schools and private schools. Under various articles of the Indian Constitution, free and compulsory education is provided as a fundamental right to children between

the ages of 6 and 14. India's improved education system is often cited as one of the main contributors to its economic development. Much of the progress, especially in higher education and scientific research, has been credited to

various public institutions. Indian schools in Bahrain are mainly affiliated to the Central Board of Secondary Education (CBSE) which is a national level board of education in India for public and private schools, controlled and

managed by Union Government of India. The following schools are affiliated to the CBSE: The Indian School Bahrain (ISB), the New Indian School (NIS), Bahrain Indian School(BIS), the Asian School, the New Millennium

School(NMS), Ibn Al Hyatham Islamic School and Al Noor International School. The Indian School, Bahrain founded in the year 1950, was initiated by the efforts of the Indian community in the Kingdom of Bahrain. The school commenced its journey with a committed workforce - a Head Mistress and three staff members. 70 years of its successful existence, the school has made significant contribution towards education excellence. Today, the Indian School, Bahrain is one of the largest expatriate schools in the Arabian Gulf with strength of over 12,500 students and an enthusiastic workforce of 650 members. The school caters to the educational needs of not only the Indian expatriate community in the Kingdom but also to the students of 14 nationalities including 1000 Bahraini children. CBSE is a lot more student-friendly than State Boards. Its course structure is designed to ensure that students do not face a lot of pressure and books are made interactive and interesting. Also, lots of fun activities are included in between the chapters to help

students learn in a playful way. It makes the whole process of conveying knowledge to the students efficient and healthy. The CBSE curriculum will definitely help students a lot if they are planning

India has been leading silicon valleys in the world and about 10% of its GDP accounts from this area. Moreover for the past two years it has established a major national program on Artificial Intelligence focusing on research, which makes it a great opportunity for Bahrain to benefit from its strong ties with India to establish the kingdom as another Artificial Intelligence centre, covering the middle east and replicating India's model for this region.

JASSIM HAJI
