## Outstanding Achievement in JEE Main 2026 for BIS

Manama

Bhavans- Bahrain Indian School's (BIS) Grade 12 students registered an exceptional performance in the Joint Entrance Examination (JEE) Main 2026, one of India's most prestigious and competitive national-level engineering entrance examinations conducted by the National Testing Agency.

BIS students Pranav Bobby Sekhar (98.5 percentile), Ishaan Pande (98.3 percentile) and Ettan Abie Cherian (93.1 percentile) have delivered outstanding results, bringing great laurels to the institution. Their remarkable success reflects their

dedication, perseverance, and academic excellence. These students have been part of BIS since

their primary years. The school's strong academic foundation and the consistent guidance of its

dedicated teachers have played a vital role in building their conceptual strength in STEM sub-

jects, enabling them to achieve this exceptional performance.

The JEE Main is a crucial gateway examination for admission to premier engineering institutions across India. It assesses students' conceptual understanding and problem-solving skills in Physics, Chemistry, and Mathematics, serving as a benchmark for academic excellence and a stepping stone toward advanced studies in engineering and technology.

BIS Directors Mr. Himanshu Verma & Mrs. Ritu Verma extended their heartfelt congratulations to Pranav, Ishaan, and Ettan on their impressive achievement. "Their success not

only makes the school proud but also inspires their peers to set high goals and strive for excellence", said Mr. Himanshu Verma. "We are confident that this milestone will open doors to bright and promising futures in engineering and beyond" added Mrs. Ritu Verma.

"This accomplishment also underscores the high academic standards and the supportive learning environment nurtured at our school. We sincerely thank our dedicated teachers for their guidance, encouragement, and unwavering commitment to fostering a culture of excellence" said Saji Jacob, Principal.

## A Grand Stage for Young Visionaries: Al Noor International School Hosts Inaugural Techno-Fest

Manama

Al Noor International School proudly hosted its inaugural Techno-Fest Exhibition 2025-2026 on 10 February in School's Multipurpose Hall, a grand showcase of digital innovation and academic excellence. The event featured a wide array of future-focused projects de-

veloped by 220 students ranging from Grade 5 through A-Levels, highlighting the school's commitment to structured, age-appropriate technological learning.

The Techno-Fest Exhibition 2025-2026 showcased a progressive learning journey, beginning with foundational digital literacy and advancing toward complex, real-world ap-

plications. In the middle school grades (5-7), students emphasized creativity through Digital Storybooks, Travel Brochures, and Digital Comic Creators, with notable entries including the "A Better World Begins With Us" AI-powered magazine and early-stage Smart City Prototypes. Students at the secondary level (Grades 8-10) demonstrat-

ed increased analytical depth with AI-driven solutions such as "Smart Cross AI" for pedestrian safety, the "DocPlant" AI Plant Doctor, and Bahrain tourist guide apps like "Pearl Planner". At the senior level (Grade 11, AS & AL), the exhibition featured academically rigorous projects integrating machine learning and computer vision, highlight-

ed by advanced Score Board applications, Study Buddy Apps and a specialized AI Voice Assistant for People with Disabilities.

Dr. Muhammad Mashood, School Director, Mr. AbduRahman Alkoheji, School's Principal, the Heads of Sections and other school officials, attended the event.

The school extended its sin-

cere appreciation to the dedicated teachers, mentors, and parents whose guidance was instrumental in the success of these student-led innovations.

The Techno-Fest 2025-2026 stands as a testament to Al Noor International School's role in shaping the next generation of tech-savvy leaders in the Kingdom of Bahrain.
